PART OF YOUR SUCCESS

EG Electronics has a strong international focus, born and headquartered in Sweden with operating locations in Europe, Asia and USA.

EG Electronics is divided into four business units:

**Displays & Systems | Electromechanics
| Memory | Connectivity & Telecom**

Whether you are working with digital signage or industrial application requiring rugged display and computer solution – our Displays & Systems business unit can provide you with the latest technology and find creative solutions to boost your future business.

We have decades of experience working with system technology products and solutions. We work closely with our customers and often in design-in projects, where our sales staff and product specialists support projects all parts, from design, prototype to development, testing and adaptation. In synergy with our organization to create your best total cost ownership, fast time-to-market and your need to longevity.

In co-operation with our colleagues from StarBit, we can offer customized software solutions as an addition to our hardware – making us a one-stop-shop for our customers!

We are ISO 9001 and ISO 14001 certified.

OUR BUSINESS MODEL

We offer a wide range of information system products that meets customer's unique needs and demands. We will follow the project from the beginning, from idea to production to delivery.

Our task is to put entire work process together and it work as cost-effective as possible – from design prototyping, pre-series to serial production and word wide logistics.

DISPLAYS

Our displays can be found in all sizes (1" to 98"), with possibility to be customized. We are an official partner to world leading display manufacturers. With decades of experience we find the best standard or custom HMI solution for your application.

These displays are characterized by longer production lifetime, backward compatibility with new models, extended temperature, high brightness etc.

Displays are suitable for industry solutions as for digital signage and for everything in between.

- 1" to 98"
- Integrated touch
- Cover glass
- Open Frame
- Monitor
- AD board/kit
- Controller boards

EMBEDDED COMPUTERS

Our products span from standard products to tailor-made solutions on highly reliable embedded technologies from well-known manufacturers in areas such as motherboards, Computer-on-Module (COM) and boxed computer.

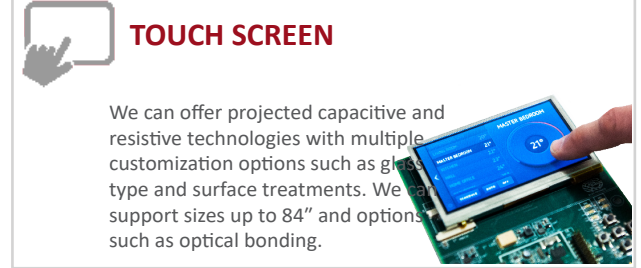

Our embedded products and solutions are suitable in various of purposes, from digital signage kiosk to automotive solution for rugged environment.

- Motherboards
- Computer on Module
- Boxed iPC
- Industrial Ethernet
- Panel PC
- Servers

TOUCH SCREEN

We can offer projected capacitive and resistive technologies with multiple customization options such as glass type and surface treatments. We support sizes up to 84" and options such as optical bonding.

MEMORY & STORAGE

Within computer storage we offer a wide portfolio of well-known brands. Depending on use case we offer drives from commercial to industrial heavy duty and enterprise drives. They come in standard form factors as well as embedded ones.

THERMAL PRINTERS

We have been working with thermal printers for more than 30 years and offer compact portable models, panelmount- and desktop with bluetooth interface f.i.! Our printers comes with extended lifetime and a minimum of maintenance.

CONNECTIVITY

We offer solutions for you to connect your system to the cloud to enable the advantages of IoT. They are available in forms of modules and boxed products with possibility to include all necessary accessories. Technologies supported are cellular (2G, 3G, LTE/4G), WiFi and LoRaWAN.
